Soft Skills: Analytical Thinking, Problem Solving, Communication, Team Collaboration, Attention to Detail

Experience

Business Analyst Intern

Sep 2025 – Mar 2026

AI Variant

- Gathered, analyzed, and documented business requirements by collaborating with 10+ stakeholders across multiple projects, ensuring clear and complete functional documentation.
- Analyzed and cleaned 8,000+ business records using Microsoft Excel and SQL, developed KPI reports and dashboards, and identified process improvement opportunities that supported data-driven decision-making.
- Prepared BRD documentation, tracked project milestones, and worked with cross-functional teams to support the successful delivery of 5+ business initiatives within scheduled timelines.

Sales Analyst Intern

Nov 2024 – Dec 2024

TVS Automobile Showroom, Chennai

- Analyzed sales performance and customer data for 1,200+ customer records using Microsoft Excel to identify purchasing trends and improve reporting accuracy.
- Created daily and weekly dashboards using Pivot Tables, Lookup functions, and charts to monitor sales KPIs, service performance, and inventory metrics.
- Maintained CRM records, coordinated with sales and service teams, and collected feedback from 250+ customers to generate insights that supported customer satisfaction and service quality improvements.

Projects

Restaurant Performance Dashboard | Power BI

- Analyzed 10,000+ transaction records across 25+ branches to develop a Power BI dashboard for monitoring sales, customer ratings, and operational KPIs.
- Identified underperforming branches and recommended operational improvements, promotional strategies, and staffing optimization to support business decisions.

Financial Performance Analysis Dashboard | Microsoft Excel

- Built an Excel dashboard using 8,500+ financial records to analyze revenue, expenses, profitability, and monthly performance trends.
- Applied Pivot Tables, XLOOKUP, and charts to identify cost-saving opportunities and support budgeting and financial planning.

Crowdfunding Campaign Analysis | SQL

- Analyzed 300,000+ campaign records using SQL joins, aggregations, and filtering to identify key fundraising success factors.
- Provided data-driven recommendations on funding goals, campaign duration, and marketing strategies to improve campaign performance.
